

A photograph of two police officers walking on a city street. They are wearing high-visibility yellow and black jackets with reflective stripes. The officer on the left is older, bald, and has a headset. The officer on the right is younger, with short brown hair. They are walking past a brick building with a large, arched window. A third person, a man in a green jacket, is walking in the background on the left.

SAFE SCHOOLS AND UNIVERSITIES

NEXT GENERATION SAFETY FOR THE NEXT GENERATION

CREATING SAFE PLACES FOR LEARNING

Schools and universities are meant to be places for safe teaching and learning, free from crime and violence. A place where the next generation can grow and learn.

But this is only achievable with a foundation of safety. Everything starts with safety. It's the core that holds educational centre operations together.

At Motorola Solutions, we've created the first and only end-to-end technology ecosystem that unifies voice, video, data and analytics in a single platform. Together this Safe Schools and Universities ecosystem provides you with the foundation of safety you need by addressing your unique challenges, from everyday incidents — a fight in a hallway, an allergic reaction in the restaurant or an injury in gym class — to extreme events, including intruders and emergency alarms.

We're also reimagining how the technologies used to help keep schools and universities safe can do even more — drive efficiencies and generate better outcomes. Because safety, efficiency and productivity are deeply interconnected. With the right technologies, you can be faster, smarter, more focused and more resilient — better at everything you do.

When technologies communicate and learn from each other, safety and performance improves across your entire facility. Intelligence advances outwards, giving you eyes and ears where you've never had them before. Information flows where it's needed — from cameras, to radios, to smart devices, to security operations centres — and what you need to know is made clear. People collaborate in more personalized and productive ways, using any network or device they want. Fairness and accuracy replace biases and blindspots. Resiliency increases and decisions improve.

Our Safe Schools and Universities technologies come together to efficiently keep students and staff secure, providing the certainty of safety you need. Bridging the gap in areas of risk, which often thrive in the unknown and the unseen. Helping you not only respond and manage both the everyday and the critical emergencies, but also recognize patterns, anticipate actions and help prevent situations from becoming major incidents. Reassuring everyone who comes through your doors that potential threats can be identified and resolved before they escalate. Ensuring that if the unthinkable happens, there are plans and technology in place to respond as quickly as possible.

EXAMPLE USE CASE: PERIMETER BREACH

Our Safe Schools and Universities integrated ecosystem allows you to address everyday concerns as well as emerging situations through the four pillars — Detect, Analyze, Communicate and Respond. We will explore how these pillars work together to address your challenges through the example of a Perimeter Breach.

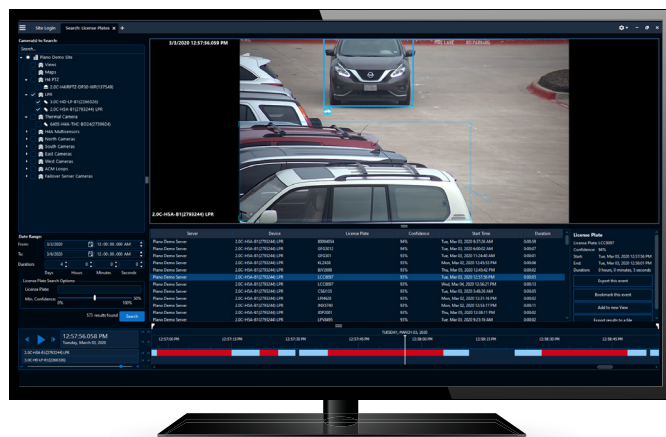

DETECT

Managing your grounds can be a challenge. From overseeing building entries, controlling student and visitor activity, and monitoring access, detection plays a critical role in minimizing potential threats.

Integrated video security monitors and identifies unusual activity and potential intruders across campus. Automatic license plate recognition analyzes vehicles entering and exiting campus — detecting and reporting suspicious vehicles on school or university property. Building entry management provides access control, automates lockdowns and pushes notifications of potential entry breaches to your response team's radios.

All of this comes together to improve your situational awareness and help increase early risk detection.

License Plate Recognition

DETECTION SOLUTIONS

Video Security

Capture critical details and enhance visibility across campus with specialized cameras for every location — such as fisheye for classrooms and lecture theatres, multi-sensor for hallways, and pan-tilt-zoom for parking lots.

License Plate Recognition

Set an outer perimeter, monitoring the main entrances and exits to your campus and providing an alert when threat-designated vehicles enter your grounds.

Access Control

Manage staff, student and visitor access to buildings or restricted areas using a role-based system with instant detection of individuals at access points.

Watch List Alerting

Set an inner perimeter, identifying people of interest based on a secure, controlled watch list created and maintained by authorized users on your staff.

Radio Alert

Receive critical alerts directly on your radio with sensor and camera analytics that connect seamlessly with your system, monitor activity and provide for a more focused response.

PERIMETER BREACH - DETECT

License Plate Recognized

Disgruntled ex-employee license plate detected entering school or university grounds.

ANALYZE

Every day, you're responsible for monitoring a large campus to maintain the safety of hundreds of students. Searching through the collected data in order to recognize concerning behaviours on and around campus is a demanding task.

Video analytics detect potentially suspicious activity on your property, providing real-time insights into campus movements. Appearance searches quickly and seamlessly explore video footage and locate students and visitors through physical descriptions, allowing easy identification. Unusual motion detection reveals atypical events which need investigating.

Ultimately, these insights enable proactive monitoring and management across campus — enabling you to respond to suspicious behaviour before an incident occurs.

Appearance Search

ANALYTIC SOLUTIONS

Avigilon Appearance Search™

Find who you are looking for faster with searches using specific physical descriptions such as clothing colour, gender or age.

Identity Search

Map personnel movements on-site with video feeds intelligently integrated with ID badge and credential activity tracking in order to visually retrace campus movements.

Unusual Motion & Activity Detection

Reveal atypical events with artificial intelligence that “learns” typical activities and flags unusual motion or activity turning unknowns into insights.

Focus of Attention

Easily identify where action is required with potentially critical video activities identified by colour-coded hexagons so you can focus your attention on what's important.

Self-Learning Video Analytics

Monitor school and university properties 24/7 with video software that detects abnormal or concerning activity to enable immediate response.

PERIMETER BREACH - ANALYZE

Appearance Detected

Face match video analytics locates unauthorised person on the property and alerts security officers.

COMMUNICATE

Whether it's a routine fire drill, a sudden food fight in the restaurant or an emergency situation, clear and timely communication is key to creating a connected and protected campus.

Communications — including radios and LTE devices — instantly and reliably connect your security, administration, bus drivers and staff. Radio alerts ensure key personnel are informed of critical alerts. Mass notification enables you to send critical information to faculty, staff, students, parents and guardians quickly and easily, keeping the community aware of campus activity.

Connectivity — both on and off campus — is an important part of creating a safe and collaborative educational environment where you and your team are always aware.

Avtec Scout Dispatch

COMMUNICATION SOLUTIONS

Two-Way Radio Communication

Ensure your team can hear and be heard across campus with superior voice clarity, long battery life and outstanding range.

WAVE PTX™ Broadband Push-to-X

Communicate instantly regardless of device, network or geographic boundaries with extended connectivity and reach that enables sharing to smartphones, tablets, laptops and even land-lines — enhancing situational awareness.

Dispatch Software

Simplify and standardize your dispatch process and workflow with a dashboard view of assigned or pending calls, and available units. Keep your team in touch across different devices, networks and locations, sending private or group calls to all users across all devices.

PERIMETER BREACH - COMMUNICATE

Notification Communicated

Alert dispatched to staff across radios and smartphones to lock-down all areas.

RESPOND

Whether it's an everyday situation or an emergency, being ready and aware can make a critical difference. Having a comprehensive communications and action plan that can be seamlessly activated ensures your personnel are able to respond calmly and effectively with minimal disruptions to the learning environment.

Emergency connectivity ensures instant access to your local law enforcement agency for immediate notification and effective engagement of emergency response teams. Mission-critical devices provide interoperability and seamless communications when you need it most. Real-time intelligence shares alerts and live video feeds with campus personnel and public safety, enabling a coordinated and informed response and providing eyes on the scene for your staff and local responders.

Because enabling rapid response and documenting past incidents can be the key to preventing incidents from becoming tragedies.

Control Room Solutions

RESPONSE SOLUTIONS

Control Room Solutions

Integrating powerful voice and data communications with advanced fleet control and dispatch functionalities, Control Room Solutions maximize your operational effectiveness. Control room personnel are equipped with tools that allow them to organize and deliver tasks more efficiently, communicate better with teams in the field and make faster, sounder decisions when incidents happen.

Dynamic Interoperability

Establish real-time coordination and dynamic, seamless, secure communication with connectivity between two-way radios and smartphones whenever and wherever it is needed.

Emergency Response Access Control

Empower an immediate first response with full access to rule-based actions and notifications from any workstation, ensuring management of all ingress and egress points anytime, anywhere.

PERIMETER BREACH - RESPOND

First Response Dispatched

Local police directly informed with video for immediate first response and incident logged with associated data.

“The system has significantly increased the security of our large building. Coverage of 20 access points to our building is an enormous task for our administrative team. We now have access to respond to all breaches in a moment’s notice. In the past, we may or may not have even known our exterior doors had been breached.”

– Kert Boedicker, Principal of Perry Meridian High School

SERVICES

Effectively managing a complex ecosystem can be complicated. You need the right service, support and management to ensure your day-to-day needs are taken care of ensuring smooth operations. At Motorola Solutions, our unique service offerings provide technical support, hardware repair and replacement, and software updates to ensure your two-way radio, infrastructure, cameras and software are always working at peak performance.

92%

of educators report that creating a safe, secure environment is a priority.¹

Technical Support

Effectively troubleshoot and promptly resolve technical and non-technical issues with dedicated experts.

Repair and Replacement

Protect system components from normal wear and tear and keep them in operation with state-of-the-art diagnostics equipment, repair tools and replacement parts.

Software Updates

Ensure continuous security, extended performance and enhanced functionality of two-way radios, infrastructure and cameras with certified and pre-tested software updates.

TAKE SCHOOL AND UNIVERSITY SAFETY TO THE NEXT LEVEL

It's time to reimagine what safety can do — driving efficiencies, bolstering performance and helping you deliver a secure and supportive environment for students and pupils to learn.

By bringing together the technologies and solutions you need to detect, analyze, communicate and respond, Motorola Solutions' Safe Schools and Universities integrated technology ecosystem is helping you build a safer educational establishment. So you can attract families to communities where students can thrive. And where you can recruit the best teachers and faculty who can focus on educating the next generation.
