## Stay Connected Wherever You Are

TRBOnet Mobile Client is a feature-rich Push-To-Talk (PTT) mobile application for Android and iOS devices that extends your radio network to smartphones and tablets. The dispatcher console will treat this device as a regular two-way radio, which means that it can be a part of a talk group, it can send and receive text messages and report its location. PTT mobile apps can be added to any MOTOTRBO or DIMETRA Express network or can work as a standalone PTT over Cellular (PoC) system.

Mobile Client with MOTOTRBO

PoC System

\* A control station may be required. Please contact your sales rep for more information
