

Carbon Reduction Plan

CSE-UK-105 R1 06/01/2023

Supplier name: DTS. Solutions (U.K) Ltd

Publication date: 6th January 2023

Commitment to achieving Net Zero:

CSE are committed to achieving Net Zero emissions by 2030. This Carbon Reduction Plan will present our roadmap and demonstrate how we will achieve this result.

Baseline Emissions Footprint:

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

It must be noted that as part of the Sustainability Reporting Framework of our ultimate Parent, CSE Global Limited in Singapore, they are required to report on their's and their respective business entities' Sustainable Strategies and Performance annually. 2022 will be the first year that DTS. Solutions (U.K.) Ltd will be included in the Annual Sustainability Report. This report is lodged as part of their TCFD Disclosure to the Singapore Stock Exchange in January each year.

Baseline Year: 2021	
Additional Details relating to the Baseline Emissions calculations.	
<i>Please note that in 2021 travel was greatly reduced due to the COVID-19 Pandemic. 2021 has produced a false figure because of this. During the lockdowns, we split into two teams, with the 'Business as Usual Team' comprising of just seven key workers, the rest of the staff were working from home, therefore commuting travel was vastly reduced.</i>	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	0.0010
Scope 2	0.0078
Scope 3 (Included Sources)	0.0066
Total Emissions	0.0154

Carbon Reduction Plan

CSE-UK-105 R1 06/01/2023

Current Emissions Reporting

Reporting Year: 01/01/2022 to 31/12/2022	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0.0050
Scope 2	0.0243
Scope 3 (Included Sources)	0.1505
Total Emissions	0.1799

Our key principles are:

- Limiting emissions in accordance with the 1.5°C pathway
- Integrate sustainability into daily business operations
- Communicate our strategies clearly and ensure sustainable practices are implemented into day-to-day operations
- Develop a reporting framework
- Using Sound Science
- Promoting good governance and corporate citizenship

Emissions reduction targets:

To continue our pathway toward achieving Net Zero, we have adopted the following carbon reduction targets:

- Decrease in carbon emissions over the next three years to 0.01207 tCO₂e by the end of 2025
 - a reduction of 0.00242 annually

Carbon Reduction Projects:

At the start of our Net Zero Emissions journey, we implemented the following initiatives at the start of our baseline year, being 2022:

- All waste is sorted into recyclable and general waste. Recyclable waste is sent to various recycling plants.
- All monitors & computers are set to sleep after 5 minutes of activity to reduce energy consumption.
- We minimise travel by adopting online video conferencing.
- We offset our carbon footprint through participation in a tree-planting scheme.

Carbon Reduction Plan

CSE-UK-105 R1 06/01/2023

We are committed to reducing the impact of our business on the planet and have initiated a number of green initiatives within the company, which include:

- We propose to use more renewable energy sources.
- Our offices will investigate the viability of smart building management systems that automate control depending on occupancy, for example, switching off lights when the last person leaves a room.

Although some of these initiatives require an initial investment, we believe there will be a considerable return on investment available in terms of reduced spending on energy and reduction in greenhouse gas emissions.

We identified that there was still a significant amount of paper within the business, and the production of paper causes substantial amounts of carbon dioxide to be released into the atmosphere. We have committed to becoming a paperless office as much as possible, and where this is not possible, staff are strongly encouraged to recycle paper and cardboard. We encourage employees to edit and proof all their documents on their computers and print on recycled paper. Unless it is a formal document, staff should always print on both sides of a sheet of paper before recycling it. Memos, company announcements, and all internal communications can and should be sent through email or posted on the Company SharePoint.

As well as reducing our carbon footprint, our recycling initiative has also led to a reduction in the amount of material we send to local landfills. Based on the results of our paper recycling effort, other recyclable materials are also recycled, including metal, certain plastics, and glass.

For recycling of electrical appliances, we will partner with local businesses to ensure that all our appliances are disposed of or recycled following WEEE regulations.

Carbon Reduction Plan

CSE-UK-105 R1 06/01/2023

Declaration and Sign Off

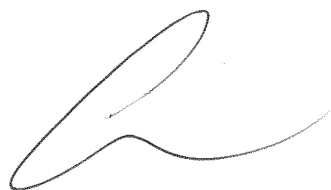

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors.

Signed on behalf of the Supplier:

G. LITCHFIELD
